Estimates made by the Ohio Agricultural Statistics Service are based on information supplied by farmers and agri-businesses. These estimates are the result of the data collected on probability designed surveys. Considerable information is collected from farmers randomly selected for telephone or personal interviews. Data for county estimates are collected from a large mail survey and, where available, check data are used to the extent possible. Our sincere thanks are also extended to the office staff, field and telephone interviewers of the Ohio Agricultural Statistics Service.

OHIO 2003 CROP SUMMARY

During the 2003 spring planting season, Ohio received frequent rain showers but unlike 2002 most farmers got their crops planted on time. The frequent rain showers lasted through the rest of spring and throughout the entire summer. The extra rain helped most of Ohio's major crops but caused problems with hay harvesting. Much of the first cutting of hay was over-mature resulting in reduced hay quality. May hay producers were unable to get a final cutting of hay in wet locations. Temperatures throughout the spring and summer were generally below normal, with accumulated growing degree days 107 points below normal in mid September. Most of the crops across the state matured late, a direct result of lower than normal temperatures.

Winter Wheat acreage was one percent jointed at the end of March. This was three percentage points behind 2002 and the State's five-year average. Ninety-seven percent of the crop was harvested by July 27, seven days behind 2002 and eight days behind the five-year average. Ohio's 2003 winter wheat yield was estimated at 68 bushels per acre, up six bushels from 2002. Growers harvested one million acres for grain in 2003 compared to 810,000 acres in 2002. Total State production was estimated at 68.0 million bushels, 35 percent more than was produced in 2002.

Ohio's 2003 average corn yield of 156 bushels per acre, set a new State record and is nine bushels above the previous record of 147 bushels per acre.

Ohio's **Corn** crop was 97 percent planted on June 15. This was slightly ahead of 2002 but six days behind the five-year average. Ninety-nine percent was emerged on June 21, three days ahead of 2002 and identical to the State's five-year average. Producers began harvesting corn silage around the middle of August and were finished by the end of October. Acreage harvested for silage was estimated at 170,000 acres, down 80,000 acres from 2002. The average silage yield was estimated at 19.0 tons per acre. Grain harvesting started around the third week in September, with the majority of the State's acreage completed by November 22. Ohio's 2003 average corn yield was estimated at 156 bushels per acre, a new State record and nine bushels above the previous record of 147 bushels per acre. Producers harvested 3.07 million acres for grain, compared to 2.97 million acres in 2002. Total State production of 478.9 million bushels, is 81 percent above the previous year's production that was reduced by a severe summer drought.

Ninety-seven percent of the **Soybean** acreage was planted by the end of June. This was six days behind 2002 and seven days behind the State's five-year average pace. By the end of the first week in July, 99 percent of the acreage had emerged. This was nearly identical to both 2002 and the State's five-year average. Harvest began around September 21 and was virtually completed by mid November. Growers harvested 4.28 million acres of soybeans in 2003 and reported an average yield of 38 bushels per acre. This was six bushels above the final 2002 yield, but slightly less than producers were anticipating earlier in the crop year. Total soybean production was estimated at 162.6 million bushels up nearly 8 percent from the 151 million bushels produced in 2002.

Favorable weather allowed producers to plant 99 percent of the **Oat** acreage by May 4. This was 29 days ahead of 2002 and 21 days ahead of the State's five-year average pace. Ninety-six percent of the crop was harvested by August 24. Ohio's 2003 average yield was estimated at 66 bushels per acre, compared to the 2002 yield of 61. Total production of 3.96 million bushels was 18 percent more than was produced in 2002. Oat producers harvested 60,000 acres in 2003, up 5,000 acres from 2002.

Burley Tobacco production fell 9 percent from 2002 to an estimated 8.75 million pounds in 2003. This was due to a drop in harvested acreage and below normal yields. Harvested acreage fell from 5,500 acres in 2002 to 5,300 in 2003, while the 2003 average yield of 1,650 pounds per acre was 100 pounds below the 2002 average yield and 158 pounds below the State's five-year average yield. **Sugarbeet** production was estimated at 46,000 tons in 2003, up 24 percent from 2002. Ohio's **Potato** production in 2003 was estimated at 1.29 million cwt., an increase of 43 percent from 2002. Harvested potato acreage is estimated at 4,300, down 100 acres from 2002. The average yield was reported to be 300 cwt. per acre, up 95 cwt. from 2002.

Alfalfa hay first cutting was four percent complete by May 18, three percent ahead of last year but seven percent behind the 1998-2002 average. Ninety-nine percent was cut by July 6, slightly behind last year but slightly ahead of the five-year average. The second cutting was completed near the end of August and the third cutting finished up near the end of September. The few that could get a fourth cutting were finished by the end of October. The first cutting of **Other hay** began on May 18 and was completed by mid July. The second cutting was completed by mid September and the third cutting was 94 percent complete by mid October.

Ohio's **Fresh Market Vegetable** acreage harvested increased six percent from 2002 to 2003. Total fresh market production decreased to 5.06 million cwt. in 2003, down 13 percent from 2002. Total farm value for fresh market vegetables in 2003 was \$120.8 million, down 18 percent from the previous year. Sweet corn and tomatoes accounted for 65 percent of the fresh market acres harvested, and 52 percent of Ohio's total fresh market production in 2003. Ohio's vegetable growers produced more sweet corn, bell peppers, pumpkins, and squash in 2003 than the previous year. Production for tomatoes and cabbage fell below 2002's value, with onions production remaining the same. Price per cwt. increased for fresh market tomatoes, bell peppers, cabbage, onions, and pumpkins. Fresh market sweet corn and squash prices fell below last year's price.

Sweet Corn acres harvested increased 800 acres from 2002, to 15,200 acres. Yield per acre increased 10 cwt. per acre to 97 cwt. per acre. Sweet corn production increased 18 percent to 1.47 million cwt. and the price decreased to \$19.70 per cwt. from \$21.20 per cwt. in 2002.

Fresh Market Tomatoes acres harvested decreased 100 acres from 2002, to 6,600 acres. Yield decreased to 175 cwt. per acre 47 percent below 2002. Production fell 53 percent from 2002 to 1.16 million cwt. in 2003. Price per cwt. was \$41.50, up \$5.50 from the previous year.

Ohio's **Pumpkin** growers harvested an estimated 6,400 acres of fresh market pumpkins in 2003, an increase of 800 acres. Yield is estimated at 170 cwt. per acre, up five cwt. from the previous year. Total production is derived at 1,088,000 cwt. up 18 percent from last year. Price is estimated at \$14.80 per cwt., an increase of \$2.80 from 2002's average price.

Ohio's **Apple** growers produced an estimated 95.0 million total pounds in 2003. Total apple production increased 36 percent from 2002 and 10 percent from 2001. The value of utilized production is estimated at \$25.3 million, up 35 percent from last year.

Peach growers produced an estimated 11.3 million total pounds in 2003, up 20 percent from 2002. The total value of utilized production is estimated at \$5.48 million, up 21 percent from 2002.

Ohio's **Grape** production increased by 40 percent from 2002 to 8,100 tons. Of the total production, 100 tons were utilized for fresh market and 6,900 tons were processed. Unharvested production made up 14 percent of total production in 2003. The total value of utilized production is estimated at \$2.79 million, up 18 percent from the previous year.

Strawberry grower's produced an estimated 38,000 cwt. in 2003, up 36 percent from 2002. The value of utilized production is \$4.56 million, up 31 percent from last year.

Ohio's 2003 burley tobacco production of 8.75 million pounds represents a 9 percent decrease from the previous year and the lowest State production since 1936. The average State yield of 1,650 pounds per acre is down 100 pounds from last year and the lowest State yield since 1996 when 1,580 pounds was reported.

Ohio's sweet corn production accounted for five percent of the U.S. total in 2003.

Ohio's pumpkin production accounted for 14 percent of the U.S. total in 2003.

2003 LIVESTOCK, DAIRY AND POULTRY SUMMARY

Highlights of Ohio's livestock statistics include cattle inventories rising above last year's all-time record low and an increase in operations. Dairy cow numbers dipped slightly to 258,000 head, but production per cow rose over one percent and total production was up from last year. Sheep breeding stock numbers were down five percent, inventory numbers were down seven percent and wool production was down 14 percent. Hog numbers were the highest since 1998, and prices were up 15 percent. Honey yields fell 29 percent and production fell 40 percent in 2003.

Cattle and calf inventories, at 1.23 million in January 2004, edged up less than one percent over last year's all-time record low of 1.22 million in January 2003. Ohio ranks 28th in the nation for cattle inventory. Ohio cattle operations rose from 27,000 in 2003 to 28,000 operations in 2004. The total inventory value of cattle and calves on January 1, 2004, rose to \$1,057.8 million, seven percent above January 2003. Cattle inventory values increased six percent from \$810 per head in January 2003 to \$860 per head in January 2004.

Milk cow numbers decreased one percent from 260,000 head in January 2003 to 258,000 head in January 2004. Milk production in Ohio rose slightly from 4.45 billion pounds in 2002 to 4.46 billion pounds in 2003. Milk prices also increased from an average of \$12.60/cwt. in 2002 to \$13.10/cwt. in 2003; a four percent increase from last year. Milk cow operations dropped by six percent in 2003, but production per cow rose one percent to an annual average of 17,269 pounds per cow, or 48.5 pounds per day. Wayne county continues to lead the state in dairy cows followed by Mercer and Holmes counties, respectively.

Hog inventory, at 1,520,000 head in December 2003, increased six percent above last year's inventory of 1,440,000 head in December, 2002. Hog operations declined two percent from 4,300 farms in December 2002 to 4,200 farms in December 2003. Hog prices increased an average of \$4.90/cwt. from a year earlier. Hog prices rose from \$33.20/cwt. in 2002 to \$38.10/cwt. in 2003, up 15 percent from the previous year. Cash receipts increased six percent boosting gross income to nearly \$280 million. Mercer and Darke counties, respectively, continue to be the number one and two leading hog counties in Ohio.

Sheep and Lamb inventories decreased from 150,000 head in January 2003 to 140,000 head in January 2004, down seven percent. In January 2004, breeding stock inventories declined five percent and the 2003 lamb crop dropped three percent. Sheep and lamb inventory values rose seven percent in January 2004 to \$146/head. Wool production in Ohio dropped off 14 percent primarily due to a 10 percent drop in fleece weights and a seven percent drop in number of head shorn. Ohio still ranks 12th nation wide in sheep numbers, and remains the leader in the Eastern United States. The leading three counties for breeding stock numbers are Knox, Wayne and Harrison, respectively.

Total **Laying Hen** numbers drifted slightly lower from 37.9 million head in December 2002 to 37.7 million head in December 2003, down less than one percent. Ohio still ranks number two in the U.S. for both laying hens and egg production. Total egg production decreased slightly from 7.9 billion eggs in 2002 to 7.6 billion eggs in 2003. Ohio supplied 8.8 percent of the nation's eggs in 2003 and generated a value of production in excess of \$374 million. **Turkey** numbers in Ohio decreased from 5.70 million birds in 2002 to 5.50 million birds in 2003. Despite a four percent decline in numbers raised in 2003, value of production rose over eight percent, generating revenues close to \$82.8 million.

Bee Colonies are 3,000 fewer in 2003, as numbers dropped from 18,000 colonies in 2002 to 15,000 colonies in 2003. Yield per colony decreased 29 percent to 50 pounds per hive. Production dropped 40 percent to 750,000 pounds in 2003. Value of production followed suit with a 40 percent drop, settling at slightly below \$1.1 million, but prices remained virtually unchanged at \$1.43 per pound in 2003.

Cattle numbers moved up fractionally above last year's all-time record low. Ohio cattle ranchers received \$50 more per head in 2003; a six percent increase from 2002.

Ohio dairy farmers produced nearly 4 1/2 billion pounds of milk. Cheese makers produced over 94 million pounds of swiss cheese supplying over 38 percent of the total U.S. production.

December 2003 hog inventory numbers were the highest since 1998. Hog prices soared 15 percent above last year.

Ohio sheep ranchers rank 9th in the U.S. for the highest lambing rate. Ohio produces 1.35 lambs per ewe which is 24 percent above the national average of 1.09 lambs per ewe.

Ohio supplies 8.8 percent of the nation's eggs. Ohio ranks 2nd in the U.S. for both laying hens and egg production.

Bee colonies are down 17 percent. Honey producers harvested 20 pounds per hive less than a year earlier.

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. 2/A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.
